Education

Universidade de Évora
BSC. IN COMPUTER SCIENCE

Évora
Sep 2018 – Jun 2021

Work Experience

AAUE - Associação Académica da Universidade de Évora
FULLSTACK DEVELOPER

Évora
January 2021 – Present

- Led a small development team to build and design revamped websites and APIs for the company which greatly improved user experience and engagement.
- Collaborated with the Design department by giving advice and suggestions of several UI components and translated designs and wireframes into high quality code via Javascript following React JS workflows.
- Developed a custom CMS and several in-house tools to automate several tasks such as the announcement of news and social events which greatly improved the workflow of non-technical staff.
- Worked in association with the university's IT Department to create a platform for student housing and renting and developed a API for them to share this data across the university's official channels.
- Troubleshoot, audited and debugged existing software to improve functionalities, security and performance by 100%.

Freelance
FULLSTACK DEVELOPER & DESIGNER

Remote
March 2022 – Present

- Worked closely with international clients on business ideas from concept to finished product.
- Architected and developed several responsive and performant web apps ensuring an excellent user experience and employing industry best practices.
